PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on frontend and full-stack internship experience. Skilled in React, TypeScript, JavaScript, Node.js and NestJS, with practical experience building REST APIs, MongoDB-backed applications and modern web interfaces. Currently contributing to an AI-enabled Library Management System with role-based workflows.

INTERNSHIP EXPERIENCE

Mavin - Frontend Developer Intern

4 months

Naxora - Full Stack Developer Intern

Current - 3 months

Working on full-stack web development using React, TypeScript, NestJS, MongoDB and REST APIs, focused on developing and integrating practical application features.

PROJECT

AI-Enabled Library Management System

- Web-based platform for books, members, issue/return, fines, reservations, reports and study-seat booking.
- Role-based workflows for Admin, Librarian/Staff and Member across core library operations.
- Built with React + TypeScript, NestJS + TypeScript, MongoDB and REST APIs; Swagger used for API documentation.
- AI-assisted features include smart book search, recommendations, insights and a role-aware library assistant.
